# Programming Assignment-3: Matrix

**Due on 2020-02-27, 23:59 IST**

You are provided with the number of rows (R) and columns (C). Your task is to generate the matrix having R rows and C columns such that all the numbers are in increasing order starting from 1 in row wise manner.

Input Format:
The first line contain two numbers R and C separated by a space.

Output Format:
Print the elements of the matrix with each row in a new line and elements of each row are separated by a space.

NOTE: There should not be any space after the last element of each row and no new line after the last row.

Example:

Input:
3 3

Output:
1 2 3
4 5 6
7 8 9

Explanation:
Starting from the first row, the numbers are present in the increasing order. Since it's a 3X3 matrix, the numbers are from 1 to 9.
