📌 Week 1 Quiz

1. Which of the following set of instructions will make the sprite(the cat) move in a triangle?
(Final and initial position, as well as the angle of the cat, should be the same)

turn 60 degrees
wait 1 seconds
move 200 steps
wait 1 seconds
turn 120 degrees
wait 1 seconds
move 100 steps
wait 1 seconds
turn -120 degrees
wait 1 seconds
move 200 steps
wait 1 seconds
turn 180 degrees

turn 60 degrees
wait 1 seconds
move 100 steps
wait 1 seconds
turn 120 degrees
wait 1 seconds
move 100 steps
wait 1 seconds
turn -120 degrees
wait 1 seconds
move 100 steps
wait 1 seconds
turn 90 degrees

turn 60 degrees
wait 1 seconds
move 100 steps
wait 1 seconds
turn 120 degrees
wait 1 seconds
move 100 steps
wait 1 seconds
turn -120 degrees
wait 1 seconds
move 100 steps
wait 1 seconds
turn 180 degrees

2. What will be the value of my variable at the end of the loop

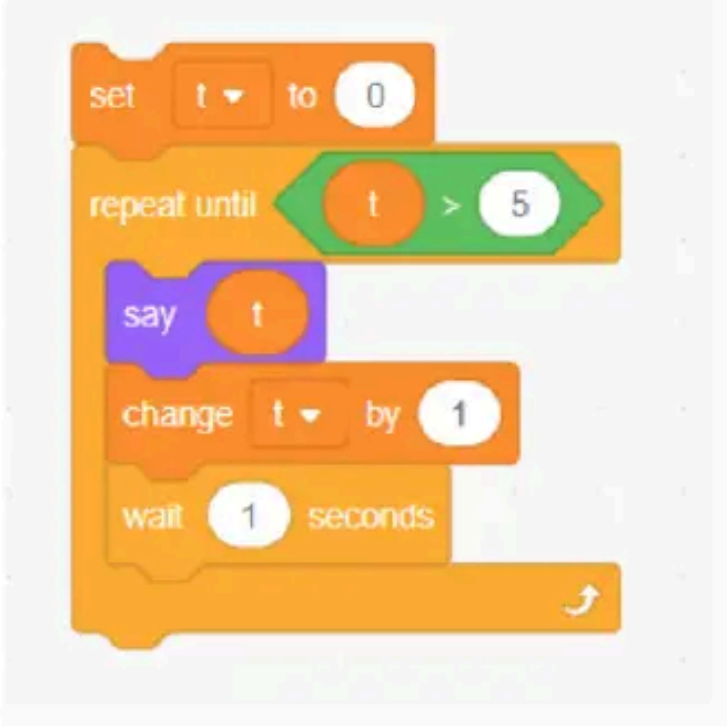

- 50
- 40 ✅
- 49
- 0

3. What will be the value of my variable?

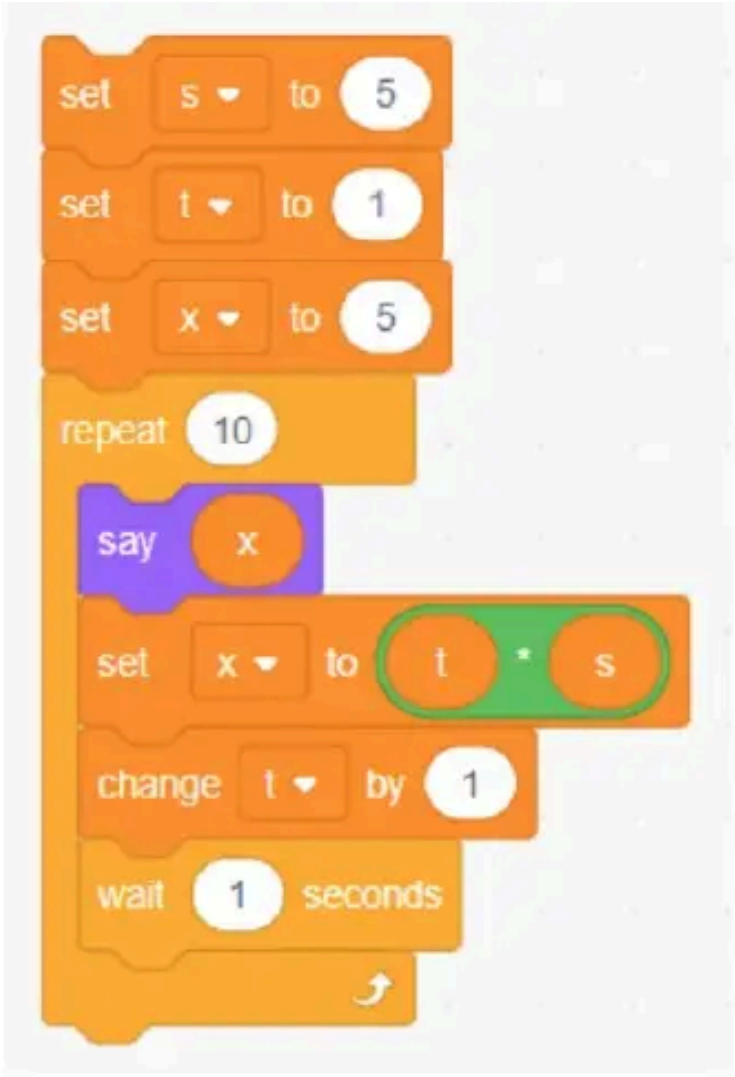

- 20
- 10
- 22 ✅
- 25

4. What the sprite(the cat) will say?

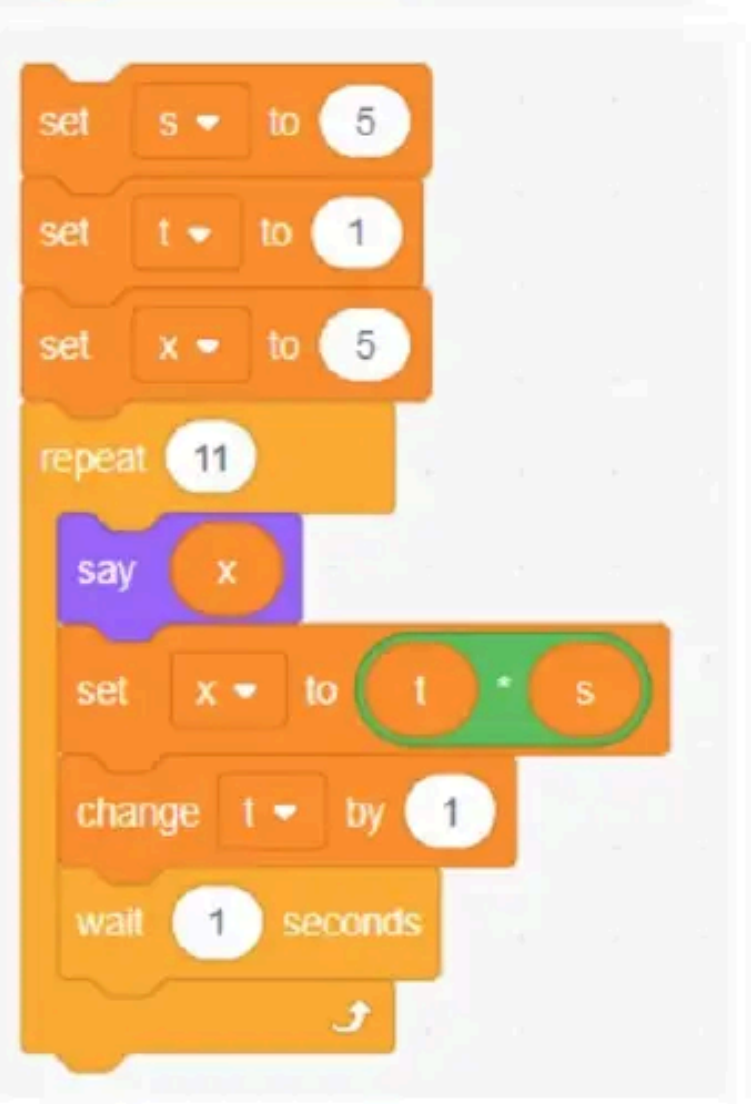

- 0, 1, 2, 3, 4, 5 ✅
- 1, 2, 3, 4, 5
- 1, 2, 3, 4, 5, 6
- None of the above

5. What should be a set of instructions to make our sprite(cat) say a table of 5?

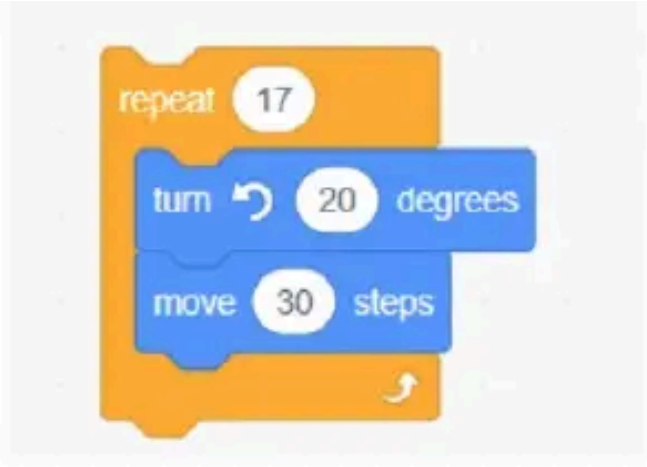

set s to 5
set t to 1
set x to 5
repeat 10
say x
set x to t * s
change t by 1
wait 1 seconds

set s to 5
set t to 1
set x to 5
repeat 10
say x
change t by 1
wait 1 seconds
set x to t * s

6. Imagine a cricket ball as our sprite, the ball will move in

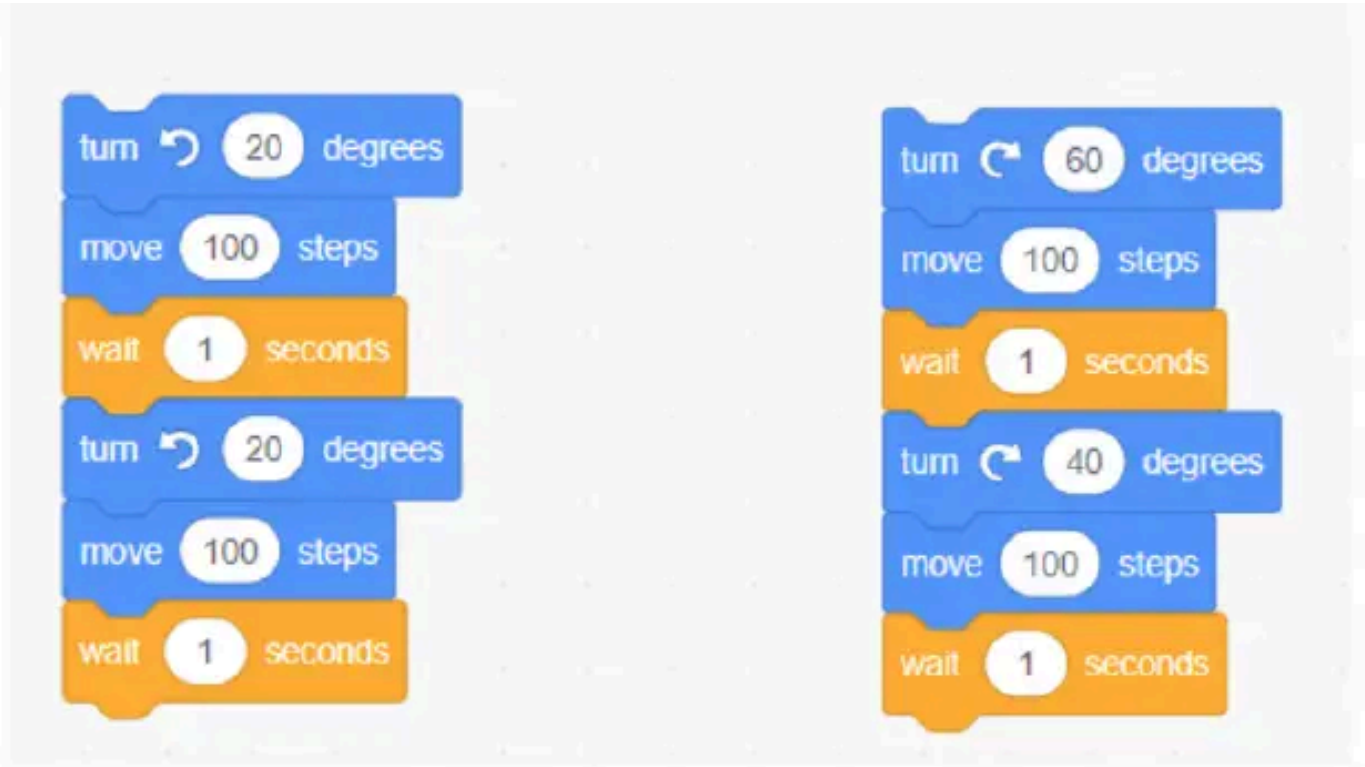

- a straight line.
- Circular motion.
- Curve path. ✅
- Up and Down.

7. Imagine sprite to be a scooter. How many times scooter will move forward?

- 7
- 4
- 6
- 5 ✅

8. Imagine a cricket player hitting a sixer on a delivery. Which code block represents the upward moment and downward movement of the ball.

- Left Block represents downward movement and the right block represents upward movement.
- Left Block represents upward movement and the right block represents downward movement. ✅
- Both blocks represent upward movement.
- Both blocks represent downward movement.

9. Which of the following statements is true about the following block of code?

- This code block is adding 7 random numbers between 1 - 10 to x. ✅
- This code block is adding 10 random numbers between 1 - 10 to x.
- This code block is adding 7 random numbers between 1 - 10 to t.
- This code block is adding 10 random numbers between 1 - 10 to t.

10. Which of the following is true about scratch?

- We can not add sound to our animations.
- We can not make a picture disappear.

- We can run a forever loop. ✅
- We can not make new variables.
